Dear Cathrin

India welcomes this "voluntary" framework for Registry Operators to respond to online security threats. We endorse the need for strengthening of security related to online threats and are of the view that this framework will help in tackling online threats like Pharming, Phishing, Malware, Ransom ware, Botnets, Child Pornography etc.

We believe that inputs which will be received as part of the public consultation process would make the framework ready for adoption by all new gTLD Registry Operators.

Warm Regards

T. Santhosh

Dear GAC Members,

The GAC Public Safety Working Group (PSWG) is seeking GAC endorsement of the attached Draft Security Framework for Registries. This was drafted by representatives of the GAC PSWG and Registries to provide guidance on how New gTLD Registry Operators should respond to Security Threats. As explained in the attached briefing, this framework contributes to the implementation of the Beijing GAC Advice on this matter.

For your consideration, please find attached:

- The Draft Security Framework, a 6-page document (with annotations for maximum clarity)
- A 2-page briefing providing background and recommendations to GAC Members for endorsement of the document

A dedicated **webinar** will be held **on Thursday 6 April 2017 at 12:00 UTC** for 60 minutes on this matter. It will provide an opportunity for GAC Members to learn more about this Framework and ask any questions they may have to topic leads. Please use the following details to join:

- Adobe Connect: <https://participate.icann.org/pswg/>
- Dial in details: <http://adigo.com/icann/>
- Conference ID: 36456

Please note that **unless GAC Members express objections by Friday 14 April 2017, the Draft Framework will be deemed endorsed by the GAC**, as agreed with the GAC leadership.

In the meantime, we also welcome any questions or comments you may have via email.

Best regards  
Cathrin  
(for the GAC PSWG)
